# WHAT IS PHUNICS?

**Phonics, Fun Phonics** helps kids **learn to read by reading**. The Phonics curriculum of over **300 decodable stories** spread across 9 Lexile© Levels uses standard American pronunciation and spelling. Phonics is the world's largest **decodable and tightly leveled** curriculum within a 100 Lexile© range per level. Each of the eight levels is themed with colorful art and lovable characters.

Lessons start with the 26 letters and their sounds and gradually increase in difficulty through sight words, word families, blends, long vowel patterns, and syllable separation until it prepares students to master nuanced phonics secrets such as the schwa.

Each book focuses on just one lesson with target decodable words highlighted. Teachers can assign specific books according to the needs of their students, or send students through the entire program.

Students can listen to stories, read aloud, and then test their knowledge through quizzes or retelling of the story. Teacher reports, individualized student progress checks, and read-aloud records highlight student development. Ultimately, Phonics enables students to catch up and progress beyond level.

<b>LEVEL</b>	<b>LEXILE<sup>©</sup> RANGE</b>	<b># OF STORIES</b>	<b>THEME</b>
